Out of the blazing underworld
of computer freaks
and electronic Utopias, it comes ——

Is it a book?
Or is it a way of life?

And the answer is — YES! It's —

The Living Legend OF COMPUTER LIB

He did it on his diningroom table. A few friends helped with the pasteup.

His friend Hugo agreed to handle distribution on a part-time basis.

He published it himself, in 1974.
He has never advertised it.
And now it is in its
4TH PRINTING
with
50 UNIVERSITY ADOPTIONS
(and/or university bookstore bulk orders)

and this
is only
the beginning.

THIS IS A TIME WHOSE BOOK HAS COME.

Ted Nelson's
Computer Lib.

ISBN 0-89347-002-3

ALREADY
one of the most quoted and influential books in the field,
Computer Lib
is the watchword,
the touchstone,
the lifeblood,
of wild-eyed graduate students and freaks
from coast to coast
(and all over Canada),

★The Bible of the COMPUTER LIBERATION MOVEMENT.★

TEN THOUSAND HAVE BEEN SOLD WITHOUT ADVERTISING,
and the orders grow daily.

Hundreds have been sold to walk-in customers at
KROCH & BRENTANO, CHICAGO
& THE COOP, CAMBRIDGE.

THIS IS THE BIGGIE* OF '77—

shouldn't you start moving it now?

List Price $7. 132 pp., including supplement.
Size approx. 11" x 15".
Many illustrations.

★★★★★★★★★★★★

Testimonials.

"The best damned book on computer science I've ever seen."
Carl M. Ellison,
Prof. of Comp. Sci.,
University of Utah

"It is a spirited, complex and very personal statement, an information packed message from someone who cares about people, machines, life and dreams."
Coevolution Quarterly
(Review by Marc Le Brun, Summer 1975, p. 142)

"I love it."
Max Callahan, Age 10

"It's the most humanistic book I've ever read!"
Max's Mother

"Your book has given me and many other people a great deal of pleasure... I've sent copies to Australia."
Jack Calaway,
Director of Engineering,
Transamerican Video,
Inc., Hollywood

"A doozy of a book!"
Dave Ahl, editor
Creative Computing
